Definition and Characteristics: Accounting and Transaction

10-04-25 Thursday

Accounting is the systematic process of identifying, recording, classifying, summarizing, and communicating financial information to aid economic decision-making. It serves as the language of business and provides a framework for understanding a firm's financial position and performance.

Key Characteristics of Accounting:

- **Systematic**: Follows a standard process and principles (GAAP or IFRS).
- Historical and Predictive: Reflects past events and supports future planning.
- Quantitative: Concerned primarily with monetary information.
- Reliable and Verifiable: Based on evidence (e.g., invoices, receipts).
- Comparable and Consistent: Enables year-on-year or firm-to-firm comparison.

Example: A company sells a product for \$1,000. The sale is recorded in the accounting books under revenue (income), and cash or receivable is increased by \$1,000.

Transaction: Any business event that has a financial impact on the entity and can be reliably measured.

Characteristics of a Transaction:

- Financial Impact: Affects assets, liabilities, equity, income, or expenses.
- **Dual Aspect**: Every transaction has a debit and a credit effect.
- Measurable in Money: Must be quantifiable in monetary terms.

Example: Paying salary of \$5,000 – decreases cash (asset) and increases expense.

Examples: Is it a Transaction?

- **Purchased machinery for cash** *Yes, it affects assets (machinery and cash).*
- Signed a contract to deliver goods next month (no advance received) No, no financial impact yet.
- **Paid salaries to employees** *Yes, it reduces cash and increases expenses.*
- Owner invests capital into the business Yes, it increases assets and equity.
- **Employee promoted, no monetary change** *No, it is not measurable in monetary terms.*
- Received utility bill (not yet paid) Yes, it increases liabilities and expenses.
- Customer places an order (no payment yet) No, it's a future event with no current financial effect.
- **Sold goods on credit** Yes, it increases accounts receivable and revenue.
- **Declared dividend (not paid yet)** Yes, it creates a liability.
- **Paid electricity bill** Yes, it decreases cash and increases expense.
- **Depreciation of machinery recorded** *Yes, it increases expense and reduces asset value.*

• **Appointed new auditor** – *No, unless fees are paid or accrued.*

Types of Accounting Reports and Their Uses

• **Income Statement (Profit & Loss Statement)**: Shows revenues and expenses over a period; indicates profitability.

Use: Assess operational performance.

• Balance Sheet (Statement of Financial Position): Displays assets, liabilities, and owner's equity at a specific point in time.

Use: Understand financial position and solvency.

• Cash Flow Statement (Statement of Cashflows): Reports cash inflows and outflows from operating, investing, and financing activities.

Use: Monitor liquidity and cash management.

• Statement of changes in Equity (Remained earned statement): Explains changes in equity from investments, withdrawals, and retained earnings.

Use: Analyze changes in owner's interest in the firm.

Characteristics of Good Accounting Reports:

- **Relevance**: Information must aid decision-making.
- Faithful Representation: Complete, neutral, and free from error.
- Understandability: Clear presentation for users.
- **Comparability**: Allows evaluation across periods and entities.
- **Timeliness**: Provided in time to be useful.

Users of Accounting Information

- Internal Users:
 - Managers for planning and control.
 - Employees job security and performance.
 - Owners profit evaluation.
- External Users:
 - Investors profitability and risk analysis.
 - Creditors repayment ability.
 - Government taxation and regulatory compliance.
 - Customers supplier stability.
 - Regulatory Bodies ensure legal conformity.

	Payable, Interest Payable), Unearned Revenue, Loans Payable,		
	Bonds Payable, Taxes Payable, Deferred Revenue, Lease Obliga-		
	tions, Credit Card Payable, Mortgage Payable		
Owner's Equity	Capital, Retained Earnings, Drawings, Owner's Contributions,		
	Common Stock, Preferred Stock, Additional Paid-in Capital, Trea-		
	sury Stock, Accumulated Other Comprehensive Income		
Income (Revenue)	Sales Revenue, Service Revenue, Interest Income, Rental Income,		
	Commission Revenue, Dividend Income, Consulting Revenue,		
	Royalties Earned, Investment Income, Subscription Revenue,		
	Gain on Sale of Asset, Foreign Exchange Gain		
Expenses	Salaries and Wages Expense, Rent Expense, Utilities Expense, In-		
	surance Expense, Depreciation Expense, Amortization Expense,		
	Interest Expense, Advertising Expense, Supplies Expense, Repairs		
	and Maintenance Expense, Legal Fees, Audit Fees, Delivery Ex-		
	pense, Telephone Expense, Training Expense, Bad Debts Expense,		
	Loss on Disposal of Asset		

Sub-types of Owner's Equity:

Type	Definition	Example	
Share Capital	Amount invested by sharehold-	An investor purchases 1,000	
	ers in exchange for shares of own-	shares of a company at \$10 each;	
	ership.	\$10,000 is recorded as share cap-	
	_	ital.	
Retained Earnings	Portion of net income retained in	A company earns \$50,000 profit	
	the business after dividends are	and pays \$10,000 in dividends;	
	paid.	\$40,000 is retained earnings.	

Types of Revenue and Expenses:

• Revenue:

- Sales Revenue Income from selling goods (e.g., merchandise sales by a retailer).
- Service Revenue Income from providing services (e.g., consulting fees, legal services).

• Operating Expenses:

- Rent Expense
- Salaries and Wages
- Utilities Expense
- Insurance Expense
- Advertising Expense

- Depreciation and Amortization
- Repairs and Maintenance
- Office Supplies

• Non-Operating Income:

- Interest Income
- Dividend Income
- Gain on Sale of Assets
- Rental Income (if not core business)
- Foreign Exchange Gain

Types of Business Entities and Comparison:

Criteria	Proprietorship	Partnership	Company (Corporation)
Ownership	Single individual	2 - 20 partners	2 - unlimited Shareholders
Legal Identity	No separate legal en-	Not a separate legal	Separate legal entity
	tity	entity (except LLP)	
Liability	Unlimited liability	Unlimited (except	Limited to shareholding
		LLP)	_
Capital Source	Personal funds	Partner contributions	Share issuance, retained
_			earnings
Regulation	Minimal legal formal-	Moderate regulation	Heavily regulated by com-
	ities		pany laws
Continuity	Ends on owner's	Ends on partner exit	Perpetual succession
	death or withdrawal	(unless reconstituted)	-
Taxation	Taxed as personal in-	Taxed as personal in-	Separate entity, corporate
	come	come of partners	tax applies

Standard Accounting Reports with Examples

17-04-25 Thursday

Standard Accounting Reports with Examples:

• 1. Income Statement (Profit and Loss Statement):

Particulars	Amount (USD)

⁴Also known as: Net Profit, Net Earnings, Bottom Line

Particulars	Amount (USD)
Beginning Capital	30,000
Add: Owner Contribution	5,000
Less: Owner Withdrawals	(10,000)
Add: Net Profit	20,000
Less: Divident	(10,000)
Ending Capital	35,000

Question

Sakiful Alam and Aziz Khan opened a web consulting business called **Money Laundering Services Pvt. Ltd.** and completed the following transactions in its first month of operations:

- **June 1:** Alam and Khan invested BDT 80,000 cash along with office equipment valued at BDT 26,000 in the company.
- **June 2:** The company prepaid BDT 9,000 cash for 12 months' rent for office space. (*Hint: Debit Prepaid Rent for BDT 9,000*)
- **June 3:** The company made credit purchases for BDT 8,000 in office equipment and BDT 3,600 in office supplies. Payment is due within 10 days.
- **June 6:** The company completed services for a client and immediately received BDT 4,000 cash.
- **June 9:** The company completed a BDT 6,000 project for a client, who must pay within 30 days.
- **June 13:** The company paid BDT 11,600 cash to settle the account payable created on June 3.
- **June 19:** The company paid BDT 2,400 cash for the premium on a 12-month insurance policy. (*Hint: It is prepayment*)
- June 22: The company received BDT 4,400 cash as partial payment for the work completed on June 9.
- June 25: The company completed work for another client for BDT 2,890 on credit.
- June 28: The company gave BDT 5,500 to Alam and Sakiful in cash as dividends.
- **June 29:** The company purchased BDT 600 of additional office supplies on credit.
- **June 30:** The company paid BDT 435 cash for this month's utility bill.

Balance Sheet of Money Laundering Services Pvt. Ltd. As at June 30, 2025

Assets	Liabilities and Owner's Equity
Current Assets	Current Liabilities
Cash BDT 66,465	Accounts PayableBDT 600
Accounts ReceivableBDT 4,490	
Office SuppliesBDT 4,200	
Prepaid Rent	
Prepaid InsuranceBDT 2,400	
Non-current Assets	Owner's Equity
Office Equipment BDT 60,000	Owner CapitalBDT 106,000
	Retained EarningsBDT 39,955
Total Assets BDT 146,555	Total Liabilities and Equity BDT 146,555

Clarification Notes:

Cash (BDT 66,465):

- Initial investment: BDT 80,000
- Service revenue (June 6): BDT 4,000
- Partial payment from client (June 22): BDT 4,400
- Prepaid rent (June 2): BDT (9,000)
- Payment for June 3 purchases: BDT (11,600)
- Prepaid insurance (June 19): BDT (2,400)
- Dividends (June 28): BDT (5,500)
- Utilities expense (June 30): BDT (435)

Office Equipment (BDT 34,000):

- Initial contribution: BDT 26,000
- Purchased on credit (June 3): BDT 8,000

Office Supplies (BDT 4,200):

- Purchased (June 3): BDT 3,600
- Purchased (June 29): BDT 600

Prepaid Rent (BDT 9,000):

• Paid in advance for 12 months (June 2)

Prepaid Insurance (BDT 2,400):

• 12-month insurance premium paid (June 19)

Accounts Receivable (BDT 4,490):

- Service provided (June 9): BDT 6,000
- Service provided (June 25): BDT 2,890
- Partial collection (June 22): BDT (4,400)

Accounts Payable (BDT 600):

- Equipment purchased (June 3): BDT 8,000
- Supplies purchased (June 3): BDT 3,600
- Payment made (June 13): BDT (11,600)
- Supplies purchased (June 29): BDT 600

Owner Capital (BDT 106,000):

- Cash invested: BDT 80,000
- Equipment invested: BDT 26,000

Retained Earnings (BDT 6,955):

- Total Revenue: BDT 12,890
- Total Expenses & Dividends: BDT (5,935)
- Net Income: BDT 6,955

Double Entry System and Debit-Credit Rules

23-04-2025 Wednesday

Double Entry System:

- Every transaction affects at least two accounts.
- Based on the accounting equation: **Assets = Liabilities + Owner's Equity**.
- Ensures accounting records are balanced.
- Promotes accuracy and reduces fraud through self-checking mechanisms.

Key Characteristics:

- **Dual Aspect:** Every transaction has a dual effect one debit and one credit.
- Balance Maintenance: Total debits always equal total credits.
- Scientific Recording: Systematic, chronological, and consistent.
- Error Detection: Helps locate posting and recording errors.

Debit-Credit Rules for Accounting Elements:

Account Type	Increase (Dr/Cr)	Decrease (Dr/Cr)
Assets	Debit	Credit
Liabilities	Credit	Debit
Owner's Equity	Credit	Debit
Revenue	Credit	Debit
Expenses	Debit	Credit
Dividends	Debit	Credit

Writing Conventions for Debit-Credit Sheets:

- Left side (Debit): Inflows, asset acquisition, expense recognition, or owner withdrawals.
- **Right side** (**Credit**): Outflows, liabilities incurred, revenue earned, or capital added.
- **Format:** Traditional T-account left side for debit entries and right side for credit entries.
- **Chronological Entry:** Transactions are recorded in the order they occur.
- Narration: Brief explanation is provided under the entry for clarity.

Question

On January 1, 2025, Mr. Tanvir started a business named **Tanvir Traders**. The following transactions occurred during January:

- Jan 1: Invested BDT 100,000 cash and BDT 50,000 worth of furniture.
- Jan 3: Purchased goods for BDT 30,000 in cash.
- Jan 5: Sold goods for BDT 20,000 on credit.
- Jan 10: Paid salaries BDT 5,000.
- Jan 12: Received BDT 15,000 from customers.
- Jan 15: Paid BDT 3,000 for rent.
- Jan 20: Purchased goods on credit for BDT 10,000.
- Jan 25: Sold goods for BDT 12,000 in cash.
- Jan 28: Withdrew BDT 2,000 for personal use.

Journal & Ledger

28-04-2025 Monday

Effects on Shared Capital (SC) and Retained Earnings (RE):

- Additional Investment:
 - **SC:** Increases (Positive Impact)
 - **RE:** No direct impact
- Net Income:
 - **RE:** Increases (Positive Impact)
 - **SC:** No direct impact
- Dividends Paid:
 - **RE:** Decreases (Negative Impact)
 - **SC:** No direct impact

Relations between Net Income, Revenue, and Expenses:

• Net Income (NI) Formula:

Net Income = Total Revenue – Total Expenses

- **Revenue:** Increases Net Income (Positive Relationship)
- Expenses: Decreases Net Income (Negative Relationship)

Impact of Expenses on Retained Earnings:

- Higher expenses lower Net Income.
- Lower Net Income results in a lower addition to Retained Earnings.
- Thus, Expenses indirectly reduce Retained Earnings.

Summary Table

Event	Impact on SC	Impact on RE
Additional Investment	Increase (+)	No impact
Net Income	No impact	Increase (+)
Dividends	No impact	Decrease (–)
Revenue Earned	No direct impact	Increase (via Net Income)
Expenses Incurred	No direct impact	Decrease (via Net Income)

Question

Prepare the Journal Entries for the following transactions:

- Nov 4: John Smith, the major shareholder of real estate company, received 121,000 cash from an inheritance.
- Nov 5: Smith deposited 61,000 cash in a new business bank account titled Smith Real Estate Co. The business issued ordinary shares to Smith.
- Nov 6: The business paid 700 cash for letterhead stationery for the new office.
- Nov 7: The business purchased office equipment. The company paid cash of 13,500 and agreed to pay the account payable for the remainder, 7,500, within three months.
- Nov 10: Smith sold DLD shares, which he owned for several years, receiving 68,000 cash from his stockbroker.
- Nov 11: Smith deposited the 68,000 cash from sale of the DLD shares in his personal bank account.
- Nov 12: A representative of a large company telephoned Smith and told him of the company's intention to transfer 13,000 of business to Smith.
- Nov 18: Smith finished a real estate deal for a client and submitted his bill for services, 5,000. Smith expects to collect from the client within two weeks.
- Nov 21: The business paid half its account payable for the equipment purchased on November 7.
- Nov 25: The business paid office rent of 700.
- Nov 30: The business declared and paid a cash dividend of 2,000.

Answer

Journal Entries:

Date	Account Titles and Explanation	Debit	Credit
Nov 5	Cash Ordinary Share Capital	61,000	61,000
Nov 6	Office Supplies (Stationery) Cash	700	700
Nov 7	Office Equipment Cash Accounts Payable	21,000	13,500 7,500
Nov 18	Accounts Receivable Service Revenue	5,000	5,000
Nov 21	Accounts Payable Cash	3,750	3,750
Nov 25	Rent Expense Cash	700	700
Nov 30	Dividends Cash	2,000	2,000

Important Clarifications:

- **November 4 and November 10-11:** These involve John Smith's personal transactions, hence no journal entry is needed for the business.
- **November 12:** Only a telephone conversation happened; no journal entry recorded.

Journalize, Post to Ledger, and Prepare Trial Balance

28-04-2025 Monday

Problem:

S. Alam and Aziz Khan opened a web consulting business called **Money Laundering Services Pvt. Ltd.** and completed the following transactions:

Trial Balance as of June 30, 2025:

Account Title	Debit	Credit
Cash	66,465	
Accounts Receivable	4,490	
Office Supplies	4,200	
Prepaid Rent	9,000	
Prepaid Insurance	2,400	
Office Equipment	34,000	
Accounts Payable		600
Salaries Payable		1,500
Common Stock		106,000
Dividends	5,500	
Service Revenue		12,890
Utilities Expense	435	
Salaries Expense	1,500	
Total	128,990	128,990

Common Techniques for Finding Errors in Trial Balance:

1. Divisibility by 2 Technique:

- If the difference between total debits and credits is divisible by 2, suspect that a debit has been mistakenly posted as credit or vice versa.
- Example: Difference = 540; $540 \div 2 = 270$; look for an entry of 270 posted to the wrong side.

2. Divisibility by 9 Technique (Transposition Errors):

- If the difference is divisible by 9, it may indicate a transposition error (e.g., writing 54 instead of 45).
- Example: Difference = 81; $81 \div 9 = 9$ (an integer); suspect swapped digits in entries.

Basics of Accrual Accounting

05-05-2025 Sunday

Accrual Accounting:

- Accrual accounting recognizes revenue when it is earned and expenses when they are incurred, regardless of when cash transactions occur.
- The main principle is to match revenues with related expenses in the period they occur, providing a more accurate picture of a company's financial position.
- **Example:** If a company completes a service in December but receives payment in January, the revenue will be recognized in December, not January.

Key Characteristics of Accrual Accounting:

- **Matching Principle:** Revenues and expenses are matched to the period in which they occur.
- **Revenue Recognition Principle:** Revenue is recognized when earned, not when cash is received.
- Expense Recognition Principle (or Matching Principle): Expenses are recorded when they are incurred, regardless of when cash is paid.
- Provides a more accurate financial picture for decision-making.

Different Accounting Standards:

- International Accounting Standards (IAS):
 - A set of accounting standards used globally to standardize accounting practices and financial reporting.
 - Provides the framework for reporting financial statements for companies operating across borders.

• International Accounting Standards Board (IASB):

- An independent organization responsible for developing and promoting the adoption of IFRS (International Financial Reporting Standards).

• Generally Accepted Accounting Principles (GAAP):

- A set of accounting principles, standards, and procedures used in the United States.
- Includes standards for recognizing revenue, matching expenses, and measuring financial position.

• International Financial Reporting Standards (IFRS):

- A set of global accounting standards developed by the IASB to ensure consistency and transparency in financial reporting across different countries.
- Used by companies in over 100 countries worldwide.

Cash Basis vs Accrual Basis of Accounting:

• Cash Basis Accounting:

- Recognizes revenue when cash is received and expenses when cash is paid.
- Simple to use and typically used by smaller businesses or individuals.
- **Example:** If a company receives cash in January for services rendered in December, under cash basis accounting, the revenue is recognized in January.

• Accrual Basis Accounting:

- Recognizes revenue when earned (not necessarily when cash is received) and expenses when incurred (not necessarily when cash is paid).
- Provides a more accurate picture of financial health, as it accounts for receivables and payables.
- **Example:** If a company completes a service in December but receives payment in January, the revenue is recognized in December under accrual accounting.

• Comparison:

- Cash Basis: Simple, easier to implement, less comprehensive.
- Accrual Basis: More complex, but provides a better financial picture, required for larger businesses and public companies.

Key Differences between Cash and Accrual Basis:

Feature	Cash Basis	Accrual Basis		
Revenue Recognition	When cash is received	When revenue is earned, re-		
		gardless of cash receipt		
Expense Recognition	When cash is paid	When expenses are incurred,		
		regardless of cash payment		
Complexity	Simple	More complex		
Accuracy in Financial	Less accurate	More accurate		
Reporting				
Used By	Small businesses, individu-	Larger businesses, corpora-		
	als	tions		

Conclusion:

Cash vs Accrual Basis:

Below is a table demonstrating the difference between Cash Basis and Accrual Basis for various transactions. The first column lists the transactions, while the second and third columns indicate whether the event is recognized under Cash Basis or Accrual Basis.

[&]quot;While cash basis accounting is simpler and easier for small businesses, accrual accounting is the preferred method for larger entities and public companies due to its ability to provide a more comprehensive view of financial performance."

Transaction	Cash Ba-	Accrual
	sis	Basis
Sold services worth 2000 USD on credit	No	Yes
Received cash for services rendered in previous month	Yes	Yes
Paid rent for the month	Yes	Yes
Purchased office supplies on credit	No	Yes
Received payment for previous month's credit sales	Yes	Yes
Paid salary to employees for the month	Yes	Yes
Completed a service but client will pay next month	No	Yes
Received advance payment for services not yet performed	Yes	Yes
Paid a supplier for goods purchased last month	Yes	Yes
Sold goods on credit for 5000 USD	No	Yes
Paid for utilities used in the month	Yes	Yes

Time Period Concept and Revenue Recognition Principle (IFRS 15):

- **Time Period Concept:** This accounting concept asserts that financial transactions should be recorded in the period in which they occur, not when cash is exchanged. This ensures that the financial statements reflect the true financial position during that time.
- **Revenue Recognition Principle (IFRS 15):** Revenue should be recognized when control of the goods or services is transferred to the customer. This principle ensures that revenue is reported in the correct period, matching expenses incurred to earn the revenue.

Five-Step Revenue Recognition Process (IFRS 15):

The five steps provide a framework for recognizing revenue, as outlined in IFRS 15:

- 1. **Identify the contract with a customer:** A contract must be enforceable and agreed upon by both parties.
- 2. **Identify the performance obligations in the contract:** These are the promises to transfer goods or services to the customer.
- 3. **Determine the transaction price:** This is the amount of consideration the company expects to receive for transferring goods or services.
- 4. **Allocate the transaction price to the performance obligations:** If the contract has multiple performance obligations, allocate the transaction price to each based on relative standalone selling prices.
- 5. **Recognize revenue when (or as) the performance obligation is satisfied:** Revenue is recognized when control of the good or service is transferred to the customer.

Example of Recognizing Revenue (IFRS 15):

Assume a company signs a contract to provide a service worth 10,000 USD over a period of 5 months. The customer agrees to pay the full amount up front, but the service is provided monthly.

• **Step 1:** Identify the contract — The agreement is a valid and enforceable contract between the company and the customer.

- **Step 2:** Identify the performance obligations The service provided over 5 months is one performance obligation.
- **Step 3:** Determine the transaction price The total transaction price is 10,000 USD.
- **Step 4:** Allocate the transaction price The price is allocated evenly over the 5 months (2,000 USD per month).
- **Step 5:** Recognize revenue The company recognizes 2,000 USD revenue each month as the service is provided.

Adjusting Accounts, and Balance Sheet Recognition

08-05-2025 Sunday

Additional Examples of Revenue Recognition:

• Subscription Services:

- A magazine company receives an upfront payment of \$240 for a one-year subscription. The company must recognize revenue as it delivers each issue of the magazine.
- Cash Basis: Revenue is recognized when cash is received (upfront payment of \$240).
- Accrual Basis: Revenue is recognized monthly as the magazine is delivered (recognize \$20 per month).

• Construction Contract:

- A construction company is hired to build a building for \$1,000,000, with payments made as milestones are achieved.
- Cash Basis: Revenue is recognized when the milestone payment is received.
- Accrual Basis: Revenue is recognized as the work progresses, even if payments are received in advance or after milestones are completed.

• Retail Sales with Returns:

- A retail company sells goods for \$100,000 in December, but allows returns for 30 days.
- Cash Basis: Revenue is recognized when the cash is received (December).
- Accrual Basis: Revenue is recognized in December but with an allowance for returns (e.g., 5% of total sales as returns).

• Real Estate Sale:

- A real estate company sells a property for \$500,000, and the buyer pays the full amount at the closing.
- **Cash Basis:** Revenue is recognized when the cash is received.
- **Accrual Basis:** Revenue is recognized at the closing date when control of the property is transferred, regardless of when the payment is received.

Adjusting the Accounts: Revenue & Expense Recognition

Adjusting entries are made at the end of an accounting period to ensure that revenue and expenses are recognized in the period in which they are incurred.

• Revenue Adjustments:

- Unearned Revenue (Advance Revenue):

* A company receives \$10,000 in advance for services to be performed over the next 6 months.

* Journal Entry:

Debit: Cash 10,000, Credit: Unearned Revenue 10,000

* Each month, \$1,667 is recognized as revenue as the service is performed.

Debit: Unearned Revenue 1,667, Credit: Service Revenue 1,667

- Accrued Revenue (Earned but not yet received):

- * A company completes a project worth \$5,000 in December, but the client will pay in January.
- * Journal Entry:

Debit: Accounts Receivable 5,000, Credit: Service Revenue 5,000

• Expense Adjustments:

- Prepaid Expenses (Paid in Advance):
 - * A company pays \$12,000 for 12 months of insurance coverage in advance.
 - * Journal Entry (initial):

Debit: Prepaid Insurance 12,000, Credit: Cash 12,000

* Each month, \$1,000 of insurance expense is recognized.

Debit: Insurance Expense 1,000, Credit: Prepaid Insurance 1,000

- Accrued Expenses (Incurred but not yet paid):

- * A company owes \$3,000 in wages for work done in December, to be paid in January.
- * Journal Entry:

Debit: Wages Expense 3,000, Credit: Accrued Wages Payable 3,000

Example of Complete Transactions and Balance Sheet Recognition:

Let's assume a company engages in several transactions that affect its balance sheet at the end of the period.

- **Transaction 1:** A company sells goods worth \$50,000 on credit.
 - Balance Sheet Effect:
 - * Increase in Accounts Receivable (Asset): \$50,000
 - * Increase in Revenue (Equity via retained earnings): \$50,000
- Transaction 2: The company receives \$30,000 in cash from the client.
 - Balance Sheet Effect:

- * Decrease in Accounts Receivable (Asset): \$30,000
- * Increase in Cash (Asset): \$30,000
- Transaction 3: The company pays \$5,000 for supplies purchased earlier on credit.
 - Balance Sheet Effect:
 - * Decrease in Accounts Payable (Liability): \$5,000
 - * Decrease in Cash (Asset): \$5,000
- **Transaction 4:** The company pays a utility bill of \$1,500 in cash.
 - Balance Sheet Effect:
 - * Decrease in Cash (Asset): \$1,500
 - * Increase in Utilities Expense (Equity through retained earnings): \$1,500

Conclusion:

"Accrual accounting provides a comprehensive and accurate picture of a company's financial health, ensuring revenues and expenses are recognized when they occur, not when cash changes hands."

Depreciation:

Depreciation is the allocation of the cost of a tangible asset over its useful life. The purpose is to match the cost of the asset with the revenue it generates over time, in accordance with the matching principle in accrual accounting.

- Straight-Line Depreciation:
 - Formula:

$$Depreciation \ Expense = \frac{Cost \ of \ Asset - Residual \ Value}{Useful \ Life}$$

- Example: A machine costing \$10,000, with no residual value, and a useful life of 5 years, will have a yearly depreciation expense of:

$$\frac{10,000}{5}$$
 = 2,000 per year

- Double-Declining Balance Depreciation:
 - Formula:

Depreciation Expense =
$$2 \times \frac{1}{\text{Useful Life}} \times \text{Book Value at Beginning of Year}$$

- Example: A machine purchased for \$10,000 with a 5-year useful life. The first year depreciation is:

$$2 \times \frac{1}{5} \times 10,000 = 4,000$$

Comprehensive Depreciation Example:

Consider a piece of equipment purchased for \$150,000 with a useful life of 5 years and no residual value. Using the straight-line method, the depreciation expense for each year is:

Depreciation Expense =
$$\frac{150,000-0}{5}$$
 = 30,000 per year

Thus, the accumulated depreciation at the end of 2025 (after 1 year) is \$30,000, and the carrying amount of the equipment on the balance sheet is:

Carrying Amount =
$$150,000 - 30,000 = 120,000$$

Depreciation Journal Entries:

Depreciation is recorded periodically, typically at the end of each accounting year, to allocate the cost of an asset over its useful life.

Example:

Consider a company purchasing equipment for \$30,000, with an estimated useful life of 5 years and no residual value. The company uses the straight-line method for depreciation.

Journal Entries for Depreciation:

For the first 3 years, the journal entries for depreciation would be the same each year:

Date	Account Titles and Explanation	Debit	Credit
Year 1 (End of Year)	Depreciation Expense	6,000	
	Accumulated Depreciation—Equipment		6,000
	(To record depreciation for the year)		
Year 2 (End of Year)	Depreciation Expense	6,000	
	Accumulated Depreciation—Equipment		6,000
	(To record depreciation for the year)		
Year 3 (End of Year)	Depreciation Expense	6,000	
	Accumulated Depreciation—Equipment		6,000
	(To record depreciation for the year)		

Total Depreciation after 3 Years:

Total Depreciation =
$$6,000 \times 3 = 18,000$$

Thus, after 3 years, the accumulated depreciation for the equipment would be \$18,000, and the book value of the equipment will be:

Book Value =
$$30,000 - 18,000 = 12,000$$

Depreciation and Carrying Value for 3 Years:

The following table presents the equipment's depreciation over 3 years and shows the accumulated depreciation each year, along with the final carrying value at the end of each year.

Particulars	Year 1 (BDT)	Year 2 (BDT)	Year 3 (BDT)
Equipment (Acquisition Cost)	30,000	30,000	30,000
Accumulated Depreciation—Equipment	(6,000)	(12,000)	(18,000)
Book Value / Carrying Value	24,000	18,000	12,000

Explanation:

- In **Year 1**, the company records depreciation of BDT 6,000. The carrying value at the end of Year 1 is 30,000 6,000 = BDT 24,000.
- In Year 2, an additional BDT 6,000 of depreciation is recorded, bringing the accumulated depreciation to BDT 12,000. The carrying value at the end of Year 2 is 30,000 12,000 = BDT 18,000.
- In **Year 3**, another BDT 6,000 is depreciated, bringing the accumulated depreciation to BDT 18,000. The carrying value at the end of Year 3 is 30,000 18,000 = BDT 12,000.

Exceptions to Depreciation:

There are certain assets that are **not depreciated** because they do not lose value over time, or their value is considered to be indefinite.

• Land:

- Land is not depreciated because its useful life is considered indefinite. While land
 may appreciate in value over time, it doesn't wear out or get consumed in the same
 way as buildings or equipment.
- **Example:** A company purchases land for \$100,000. This land will not be depreciated.

• Intangible Assets with Indefinite Life:

 Intangible assets like trademarks or goodwill with indefinite useful lives are not depreciated. Instead, these assets are tested for impairment periodically.

• Assets Under Construction:

 Depreciation is not charged on assets that are under construction until they are completed and put into use.

Assignment Question (08-05-2025):

Bashundhara City Shopping Complex Ltd. faced the following situations. Journalize the adjusting entry needed on December 31, 2025, for each situation. Consider each fact separately.

- a. The business has an interest expense of 9,000 that it must pay early in January 2026.
- **b.** Interest revenue of 4,800 has been earned but not yet received.
- c. On July 1, 2025, 13,200 rent in advance was collected; Cash was debited, and Unearned Rent Revenue was credited. The tenant was paying two years' rent.
- **d.** Salary expense is 1,800 per day—Monday through Friday—and the business pays employees each Friday. This year, December 31 falls on Wednesday.
- e. The unadjusted balance of the Supplies account is 3,300. The total cost of supplies on hand is 1,200.
- f. Equipment was purchased at the beginning of this year at a cost of 150,000. The equipment's useful life is five years. There is no residual value. Record depreciation for this year and then determine the equipment's carrying amount.

Adjusting Entries:

Date	Account Titles and Explanation	Debit	Credit
Dec 31	Interest Expense	9,000	
	Interest Payable	9,000	
	(To accrue interest expense for the year)		
Dec 31	Interest Receivable	4,800	
	Interest Revenue		4,800
	(To recognize earned interest revenue)		
Dec 31	Unearned Rent Revenue	3,300	
	Rent Revenue		3,300
	(To recognize 6 months' rent revenue)		
Dec 31	Salary Expense	5,400	
	Salaries Payable		5,400
	(To accrue salary expense for 3 days)		
Dec 31	Supplies Expense	2,100	
	Supplies		2,100
	(To adjust supplies to the actual amount on hand)		
Dec 31	Depreciation Expense	30,000	
	Accumulated Depreciation—Equipment		30,000
	(To record depreciation for the year)		

Determination of Carrying Amount of the Equipment

Particulars	Amount	
A) Acquisition Cost	150,000	
B) Accumulated Depreciation on December 31, 2025	30,000	
Carrying Amount or Book Value of Equipment (A-B) 120,000		

Adjusting Journal Entries for Real Madrid Training Academy (RMTA)

12-05-2025 Monday

Question:

Real Madrid Training Academy (RMTA) is a football school in the USA. On the next page is its unadjusted trial balance as of December 31, along with items (A) through (F) that require necessary year-end adjusting entries.

Unadjusted Trial Balance as of December 31:

Account Title	Debit	Credit
Cash	34,000	
Accounts Receivable	0	
Supplies	8,000	
Prepaid Insurance	12,000	
Prepaid Rent	3,000	
Equipment	115,000	
Accumulated Depreciation—Equipment		25,000
Accounts Payable		26,000
Salaries Payable		0
Unearned Service Revenue		12,500
Share Capital		90,000
Dividends	50,000	
Service Revenue		163,900
Depreciation Expense—Professional Library	0	
Depreciation Expense—Equipment	50,000	
Insurance Expense	33,000	
Teaching Supplies Expense	0	
Advertising Expense	6,000	
Utilities Expense	6,400	
Total	317,400	317,400

- A) An analysis of the insurance policies shows that \$2,400 of coverage has expired.
- B) An inventory count shows that supplies costing \$2,800 are available at year-end.
- C) Annual depreciation on the equipment is \$20,400.
- D) On September 1, RMTA agreed to train five kids for \$2,500 each. Training for two kids will start immediately and finish before the end of the year. Training for three other kids will not begin until next year. The client paid \$12,500 in advance for all five courses on September 1, and RMTA credited Unearned Service Revenue.
- E) RMTA's two employees are paid weekly. At the end of the year, two days' salaries have accrued at the rate of \$100 per day for each employee.
- F) The balance in the Prepaid Rent account represents rent for December.

Prepare the adjusting journal entries and determine the updated balances of the affected accounts.

Solution:

Adjusting Journal Entries:

Date	Account Titles and Explanation	Debit	Credit
Dec 31	Insurance Expense	2,400	
	Prepaid Insurance	2,400	
	(To adjust prepaid insurance for expired coverage)		
Dec 31	Supplies Expense	2,800	
	Supplies		2,800
	(To adjust supplies inventory at year-end)		
Dec 31	Depreciation Expense—Equipment	20,400	
	Accumulated Depreciation—Equipment		20,400
	(To record annual depreciation on equipment)		
Dec 31	Unearned Service Revenue	5,000	
	Service Revenue		5,000
	(To recognize earned revenue from training two kids)		
Dec 31	Salaries Expense	400	
	Salaries Payable		400
	(To accrue salaries for 2 days' work for 2 employees)		
Dec 31	Rent Expense	3,000	
	Prepaid Rent		3,000
	(To record December's rental expense)

Total	338,200	338,200

Rectification Entries Types with Examples

Rectification entries are used to correct errors in the accounting books. Below are some common types of errors along with their corresponding rectification entries.

1. Omission of Entries:

Case:

RMTA forgot to record the payment of \$500 for utilities in December.

My Previous Action:

Account Title	Debit	Credit

Ideal Scenario:

Account Title	Debit	Credit
Utilities Expense	500	
Cash		500

Rectification Entry:

Account Title	Debit	Credit
Utilities Expense	500	
Cash		500

2. Error in Commission:

Case:

An amount of \$2,000 received from UPS was correctly recorded in the cash account but was wrongly posted to the **Service Revenue** Account instead of the **A/R** in the ledger.

My Previous Action:

Account Title	Debit	Credit
Cash	2,000	
Service Revenue		2,000

Ideal Scenario:

Account Title	Debit	Credit
Cash	2,000	
Account Receivable		2,000

Rectification Entry:

Account Title	Debit	Credit
Service Revenue	2,000	
Account Receivable		2,000

3. Error of Principle:

Case:

\$500 purchase of vehicle was wrongly debited to **transportation expense**.

My Previous Action:

Account Title	Debit	Credit
Transport Expense	500	
Cash		500

Ideal Scenario:

Rectification Entry:

Account Title	Debit	Credit
Vehicle	500	
Cash		500

Account Title	Debit	Credit
Vehicle	500	
Transport Expense		500

4. Error in Amount:

Case:

The salary expense of \$3,000 was recorded as \$2,000.

Ideal Scenario:

My Previous Action:

Account Title	Debit	Credit
Salary Expense	2,000	
Cash		2,000

Rectification Entry:

Account Title	Debit	Credit
Salary Expense	3,000	
Cash		3,000

Account Title	Debit	Credit
Salary Expense	1,000	
Cash		1,000

5. Reversal of Entry:

Case:

A \$600 credit purchase of cleaning supplies was wrongly recorded as a service revenue for cleaning services on credit.

My Previous Action:

Account Title	Debit	Credit
Accounts Receivable	600	
Service Revenue		600

Ideal Scenario: The correct entry should have Rectification Entry: been:

Account Title	Debit	Credit	

Account Title	Debit	Credit
Supplies	600	
Account Payable		600

Account Titles and Explanation	Debit	Credit
Service Revenue	600	
Accounts Receivable		600
Supplies	600	
Accounts Payable		600

6. Alternative Treatment of Accruals: Case:

- Supplies are purchased on June 1 for \$2,000 cash. The entire amount was shown as an expense.
- A physical count on June 30 indicates that it has \$1,600 of supplies available.

Ideal Scenario:

Account Title	Debit	Credit
Supplies	2,000	
Cash		5,000
Supplies Expense	400	
Supplies		400
Net Impact:		
Supplies	1,600	
Supplies Expense	400	
Cash		2,000

My Previous Action:

Account Title	Debit	Credit
Supplies Expense	2,000	
Cash		2,000

Rectification Entry:

Account Title	Debit	Credit
Supplies	1,600	
Supplies Expense		1,600

Problems:

1. Case:

- The company purchased office furniture for \$2,500, but mistakenly recorded it as **Office Supplies** instead of **Office Equipment**.
- The transaction should have been classified as an asset, not an expense.

Ideal Scenario:

Account Title	Debit	Credit
Office Equipment	2,500	
Cash		2,500

My Previous Action:

Account Title	Debit	Credit
Office Supplies Expense	2,500	
Cash		2,500

Rectification Entry:

Account Title	Debit	Credit
Office Supplies Expense	2,500	
Office Equipment		2,500

2. Case:

- A sales transaction of \$1,200 was made on credit, but it was incorrectly recorded as **Cash Sales**.
- The transaction should have been recorded as **Accounts Receivable**.

Ideal Scenario:

My Previous Action:

Account Title	Debit	Credit
Accounts Receivable	1,200	
Sales Revenue		1,200

Account Title	Debit	Credit
Cash	1,200	
Sales Revenue		1,200

Rectification Entry:

Account Title	Debit	Credit
Accounts Receivable	1,200	
Cash		1,200

3. Case:

- A payment of \$300 was recorded in the wrong account. It was meant to be recorded as **Office Supplies** but was recorded as **Advertising Expense**.
- The correct classification should be **Office Supplies**.

Ideal Scenario:

My Previous Action:

Account Title	Debit	Credit
Office Supplies	300	
Cash		300

Account Title	Debit	Credit
Advertising Expense	300	
Cash		300

Rectification Entry:

Account Title	Debit	Credit
Advertising Expense	300	
Office Supplies		300
